

compliant mobility™

Making business travel and expats compliant

compliant mobility™ is the software to manage your expats and international travelers. **compliant mobility™** helps you comply with rules and regulations digitally. You gather and account for travel and expense data. You personally and automatedly manage every process and as such save on external consultant fees.

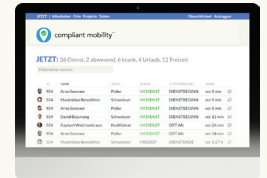

Target group: all companies with expats and international travelers globally.

Your features:

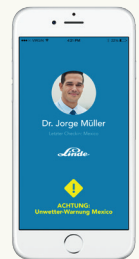

- Central web application to record all relevant employees
- Automised preparation of documents:
 - Automated checklists to correctly map internal compliance rules
 - Cost estimates of an assignment to a certain country
 - Preparation of assignment contracts
 - social security applications
 - employer statements (e.g. for rental agreements, visa, work permits etc)
 - automated authorisations of external service providers
- tracking trips and expenses through the employee themselves
- generating reports and bills
- expense accounts, reports and billing
- embed compliant mobility into your company's IT landscape via API and interfaces.

Your advantages

- You complete many expat and compliance topics internally
- You save considerably on external consultants
- Through digitalization and automation you reduce your admin efforts
- At the same time you accelerate and simplify your processes
- You gather all the information and data on our internationally mobile workforce in one single application
- You reduce the internal and external compliance risks considerably and consequently save penalty fees.
- You reduce the administrative burden on your employees considerably
- You have real-time data on your assignees whereabouts
- You have real-time knowledge of your assignees expense and travel details
- Constant data access via API
